Today: basics of functions.

Value (no &) vs reference (&) parameters.

```
int g(int w)
{
    w = 10;
    return 0;
}
int h(int& z)
{
    z = 10;
    return 0;
}

int main()
{   int x = 42;
    g(x);
    h(x);
}
```
